Full-Stack Software Engineer | Real-Time Systems | Scalable Web Platforms

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience developing scalable web applications, AI-integrated platforms, and automation-driven media systems. Experienced in building production-grade systems that combine performant frontend experiences with reliable and scalable backend architectures. Specialized in developing real-time interactive platforms, internal operational tools, and automated content pipelines using React, TypeScript, Node.js, Firebase, and event-driven architectures. Proven ability to translate business requirements into technical solutions that improve operational efficiency, streamline workflows, and enhance user engagement.

EDUCATION

UNIVERSIDAD TÉCNICA DE MANABÍ

Portoviejo, Manabí

Engineering in Computer Systems

WORK EXPERIENCE

ALPHACREW STUDIO LLC

Richardson, Texas

Web Developer

July 2022 – Present

Responsible for designing and delivering full-stack solutions focused on streamlining internal operations, powering real-time interactive experiences, and automating multimedia content workflows. Collaborate closely with product, design, and client teams to deliver scalable and production-ready systems

- Designed and developed a real-time trivia platform for sports broadcasts using WebSockets, Node.js, and Firebase, supporting 5K+ concurrent users and automating video segment generation through Remotion, reducing manual production time by approximately 40%.
- Architected and implemented an internal operations suite for applicant management, payroll, scheduling, and employee time tracking, automating administrative workflows and reclaiming approximately 15 hours of manual work per week.
- Engineered analytics and operational workflow modules for marketing and content management dashboards, integrating real-time alerts, order tracking, and CRM synchronization to optimize internal processes and accelerate campaign iteration.
- Integrated LLM-driven automation into content pipelines, enabling the programmatic generation of 50+ personalized trivia videos weekly and reducing production workflows from approximately 4 hours to under 1 hour.
- Developed and maintained backend APIs and services using Node.js, Express.js, and Firebase to support real-time interactions, scheduled processes, and automated email workflows through Google Cloud Scheduler.
- Built and maintained 20+ responsive web applications and marketing websites using React, Next.js, and WordPress, optimizing performance and page load speed to improve user experience and conversion readiness.
- Refactored legacy monolithic modules into a modular event-driven architecture, improving maintainability and reducing API response times by approximately 45%.
- Established CI/CD pipelines, automated testing workflows, and peer review practices to improve deployment reliability and accelerate feature delivery cycles.
- Collaborated directly with US-based clients and internal design teams to transform business requirements into technical specifications and production-ready solutions.

Technologies: React, TypeScript, Node.js, Express.js, Firebase, WebSockets, Remotion, Next.js, MySQL, WordPress.

SKILLS

Frontend: React, Next.js, TypeScript, TailwindCSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases & Cloud: Firebase, Firestore, MySQL

Architecture & Systems: Real-time systems, event-driven architecture, scalable frontend architecture, media rendering pipelines, API integrations

Tools & Platforms: Git, GitHub, Firebase, Postman, Figma, Remotion, Claude Code

CERTIFICATIONS

- Foundations of UX Design – Google
- Responsive Web Design – freeCodeCamp
- Software Engineering Virtual Internship – JPMorgan Chase & Co.
- EF SET English Certificate (C1) – EF Standard English Test

LANGUAGES

- English (C1)
- Spanish (Native)

ADDITIONAL INFORMATION

- Personal projects and case studies available on GitHub and personal portfolio website.
- Interested in building scalable platforms, workflow automation systems, and interactive real-time web experiences.
